**This workhorse thinner is specially formulated for product**

**compatibility and optimum performance.** Because it is a blend of extra pure thinners, this medium-speed formula will help provide high-quality and maximum gloss when used to reduce or thin all NAPCO Poly-Glass brand topcoats (excluding 320). The chemical components of the thinners you use are critical to your success. If you use this thinner, your jobs have a better chance of turning out brilliantly, reducing your stress level. One thing to note: in cold conditions you might want to use our Fast Thinner. It usually yields better results in colder conditions.

**APPLICATION: All Purpose Thinner is a medium speed high quality thinner (reducer) that contains no water and Epoxy Low Build and High Build is formulated for use with NAPCO Poly-Glass® topcoats and Primers.** It is a blend of aromatic solvents formulated to give

maximum gloss without blushing to polyurethane topcoats in most climatic conditions. Please consult Poly-Glass® topcoat labels and NAPCO Epoxy Primer labels for specific mixing instructions.

**STORE INDOORS BETWEEN 50-90°F**
