This etch and cleaner in one is perfect for tile, ceramic, or porcelain surfaces – the vertical clinging gel works to eat away at stubborn stains and will roughen the surface at the same time. Scrub and rinse away with water, and the clean, etched surface is ready to bond with the topcoat. Hard to clean stains like rust, soap scum, and, hard water dissolve away with ease using the new Piranha Prep.

APPLICATION: Chemical resistant gloves (latex or polyvinyl alcohol) and safety goggles should be worn when handling in a ventilated area. Avoid contact with eyes, skin, and clothing. Brush or spread approximately 3 to 4 oz. of Piranha Prep over the surface of a standard sized bathtub, then begin scrubbing with water and a scrub pad after 10-15 minutes of sitting on the surface. Continue to clean up with cool water after all Piranha Prep residues have been removed completely. Dry surface with rags or towels and make sure surfaces are all clean and free of stains prior to applying topcoat.

STORAGE TEMPERATURE: 50 - 85°F.
